Microeconomics in Context, Second Edition

Detailed Table of Contents
Preface
Sample Course Outlines

Part One: The Context for Economic Analysis

Chapter 1: Economic Activity in Context
1. Your Starting Point
2. The Goals of Economic Activity
   2.1 Intermediate and Final Goals
      Economics in the Real World: Goals Beyond Efficiency
   2.2 Components of Well-being
      Economics in the Real World: Goals Beyond Survival
   2.3 Economics and Well-being
3. The Issues that Define Economics
   3.1 The Four Essential Economic Activities
   3.2 The Three Basic Economic Questions
4. Economic Trade-offs
   4.1 Abundance and Scarcity
   4.2 Society’s Production Possibilities Frontier
      Economics in the Real World: The Opportunity Cost of Military Expenditures
   4.3 Tradeoffs Over Time
5. The Three Spheres
   5.1 The Core Sphere
   5.2 The Public Purpose Sphere
   5.3 The Business Sphere
   5.4 The Size of the Three Spheres
   5.5 A Comparative Note: Less Industrialized Economies
6. Microeconomics in Context
   6.1 The Context
   6.2 Our Tools for Understanding
   6.3 Economic Thinking vs. “Economistic” Thinking

Chapter 2: Economic Actors and Organizations
1. Thinking About Economic Actors and Organizations
   1.1 Economics as a Social Science
   1.2 The Relation of Economics and Business
2. Motivation and Behavior
   2.1 Intrinsic and Extrinsic Motivations
      Economics in the Real World: Normative Interpretations of Motivations
   2.2 Self-Interest, Altruism, and the Common Good
   2.3 Behavior: Habit, Constraint, or Choice?
   2.4 Information and Rationality
2.5 Optimization vs. Bounded Rationality
2.6 Now or Later?

3. The Nature of Economic Organizations
   3.1 Individual Economic Actors and Organizations
   3.2 Customary Economic Organization
   3.3 Consensual Economic Organization
   3.4 Administrative Economic Organization
   3.5 Economic Organization Through Exchange
   Economics in the Real World: Markets Are Organized Around Exchange

4. Economic Actors in the Traditional Model
   4.1 Only Individual Actors
   4.2 A Limited Set of Activities
   4.3 Restrictive Assumptions About Behavior

Part Two: Supply and Demand

Chapter 3: Market Institutions
1. The Meaning of Markets
   1.1 Markets as Places to Buy and Sell
   1.2 Markets as Social Institutions
   1.3 “The Market” as Pure Exchange
2. The Development and Expansion of Markets
   2.1 The Industrial Revolution
   2.2 The Case of England
   Economics in the Real World: Some Market Beginnings
   2.3 Industrial and Market Culture
3. Institutional Requirements of Markets
   3.1 Individualist Institutions of Property and Decision-Making
   3.2 Social Institutions of Trust
   3.3 Infrastructure for the Smooth Flow of Goods and Information
4. Markets and Well-Being
5. Types of Markets
   5.1 What Is Sold?
   5.2 How Are Prices Determined?
   5.3 What Time Period Is Covered?
   5.5 Markets in the Traditional Model

Chapter 4: Supply and Demand
1. Explaining Prices and Quantities
2. The Theory of Supply
   2.1 The Supply Schedule and Curve
   2.2 Changes in Supply
   2.3 Supply by Businesses as Producers
3. The Theory of Demand
   3.1 The Demand Schedule and Curve
   3.2 Changes in Demand
Chapter 5: Working with Supply and Demand

1. How Much Money Will Sales Bring In?
2. The Price Elasticity of Demand
   2.1 Price Inelastic Demand
   2.2 Price Elastic Demand
   2.3 Elasticity and Slope
   News in Context: Hospital Markups on Care Toughest on Poor
   2.4 A Mathematical Approach
      Calculating Percentage Changes
3. The Price Elasticity of Supply
4. Income, Price and Buyer Behavior
   4.1 Income Elasticity of Demand
   4.2 Income and Substitution Effects of a Price Change
5. Short-Run vs. Long-Run Elasticities

Part Three: Resource Maintenance, Production, Distribution, and Consumption

Chapter 6: Capital Stocks and Resource Maintenance

1. The Nature of Capital Stocks
   1.1 Stocks vs. Flows
   1.2 The Five Forms of Capital
2. The Evolution of Capital
3. Natural Capital
   3.1 Renewable and Nonrenewable Natural Capital
   News in Context: U.N. Report Describes Risks of Inaction on Climate Change
   3.2 Technology and Natural Capital
4. Manufactured Capital
   4.1 Fixed Manufactured Capital
   4.2 Inventories
4.3 Manufactured Capital in Core and Public Purpose Spheres
Economics in the Real World: Manufactured and Natural Capital Compared

5. Human Capital
   5.1 Physical Human Capital
   5.2 Intangible Human Capital

6. Social Capital
   6.1 Technology
   6.2 Social Organization

7. Financial Capital
   7.1 Equity Finance
   7.2 Debt Finance
   Economics in the Real World: Another Example of Opportunity Cost
   7.3 A Note on Terminology

8. Sustaining Capital Stocks

Chapter 7: Production Costs
1. The Production Process
   Example: Production Inputs and Outputs
2. Economic Costs
   2.1 Accounting Costs vs. Opportunity Costs
   2.2 Transaction Costs
   2.3 Internal and External Costs
   2.4 Costs and Productive Efficiency
   2.5 Social Costs and Efficiency
3. The Production Function
   3.1 Thinking About Inputs and Outputs
   3.2 Graphing a Relation between an Input and an Output
   3.3 Production in the Short Run
   3.4 Costs in the Short Run
   3.5 Production and Costs in the Long Run
   News in Context: Hoping to Grow, Diller Prunes Empire
   3.6 Technology Choice
Appendix: A Formal Model of Producer Costs
   A1 The Assumptions
   A2 The Firm’s Short-Run Costs in Detail
   A3 Total Cost and Total Variable Cost as Areas

Chapter 8: Production Decisions
1. Goals and Decision Making
   1.1 Goals and Economic Benefits from Production
   1.2 Weighing Costs and Benefits
2. Marginal Thinking
   2.1 Comparing Marginal Benefits and Costs
   2.2 Marginal Thinking: The Example of Profit Maximization
   2.3 Profit Maximization when the Price of Output Changes
   2.4 The Assumption Underlying Reliance on Marginal Thinking: Convexity
3. Discrete Decision Making
   3.1 The Discrete Decision to Produce or Not Produce
   3.2 Multiple Equilibria
   3.3 Lumpiness and Increasing Returns
   3.4 Bringing in History: Path Dependence and Switching Costs
   3.5 Bringing in Social Context: Network Externalities
   Economics in the Real World: QWERTY
4. Financial Capital as an Input to Production
Appendix: A Formal Theory of Producer Behavior with Convexity and Perfect Competition
   A1 The Assumptions
   A2 Profit Maximization
   A3 Total Revenue, Cost, and Profit as Areas
   A5 Response to Variations in Output Price

Chapter 9: Distribution: Exchange and Transfer
1. Who Gets What, and How?
   1.1 Exchange and Transfer
   Economics in the Real World: Are Taxes “Exchange” or “Transfer”?
   1.2 Ownership and Distribution in Social and Historical Context
2. Principles of Exchange
   2.1 Gains from Trade
   2.2 Other Advantages of Exchange
   2.3 Problems with Exchange
   Economics in the Real World: England, Portugal, and the Treaty of Methuen
2.4 Summing up
3. Principles of Transfer
   3.1 Gains from Transfer
   3.2 Problems with Transfer
   3.3 Summing Up
4. Distribution Outcomes in the United States
   4.1 The Distribution of Money Income
   4.2 Measuring Inequality
   4.3 Varying the Definition of Income
   4.4 Income Inequality Over Time
   4.5 Wealth Inequality
   News in Context: Dozens of Rich Americans Join in Fight to Retain the Estate Tax: Buffett, Soros and Gates's Father Call It Only Fair
   News in Context: Dying for a Tax Cut
   4.6 Equity as a Goal
Appendix: A Formal Theory of Gains from Trade

Chapter 10: Consumption and the Consumer Society
1. Consumption: Final Use
   1.1 The "Sovereign" Consumer?
   1.2 Who Are the Consumers?
2. Consumer Behavior: The Marketing View
   2.1 The Decision-making Process
   2.2 Consumer Motivation and Behavior
3. Consumer Behavior: The Utility Theory View
   3.1 The Budget Line
   3.2 Utility
   3.3 Marginal Thinking in Consumer Decision Making
   3.4 Deriving the Rule for Utility Maximization
   3.5 Further Developments and Complications
4. The Consumer Society
   4.1 The Birth of the Consumer Society
   4.2 Workers Become Consumers
   4.3 Institutions of the Consumer Society
   Economics in the Real World: Has Advertising Gotten Out of Hand?
   4.4 Changes in Other Institutions
5. Consumption and Well-Being
   5.1 Old Utility Theory, New Utility Theory, and Capabilities
   5.2 Inadequate Consumption: Poverty
   5.3 Excessive and Misdirected Consumption: “Affluenza”?
   5.4 The Ecological Impact of Consumption
Appendix: A Formal Theory of Consumer Behavior
   A.1 The Assumptions
   A.2 The Budget Line and Its Slope
   A.3 Indifference Curves
   A.4 Utility Maximization
   A.5 Response to Variations in Price

Part Four: A Closer Look at Markets

Chapter 11: Markets without Market Power
1. Understanding Market Power and Competition
2. Perfect Competition
   2.1 The Conditions of Perfect Competition
   2.2 Examples of Perfect Competition?
   2.3 Profit Maximization Under Perfect Competition
3. Efficiency and Equity in the Case of Perfect Competition
   3.1 Perfect Competition and Long-Run Efficiency
   3.2 Consumer and Producer Surplus
   3.3 Deadweight Loss
   3.4 Policy Analysis: Taxation
   3.5 Policy Analysis: Rent Control
4. A Final Note
Appendix: A Formal Analysis of a Market with Perfect Competition

Chapter 12: Markets with Market Power
1. The Three Models
2. Pure Monopoly: One Seller
   2.1 The Conditions of Monopoly
   2.2 Examples of Monopoly
   News in Context: EU Launches Competition Probe Against Microsoft Over Office, Browsers
   2.3 Profit Maximization for a Monopolist
   2.4 Monopoly and Inefficiency
   2.5 Can Monopoly be Efficient?

3. Monopolistic Competition
   3.1 The Conditions of Monopolistic Competition
   3.2 Examples of Monopolistic Competition
   3.3 Profit Maximization with Monopolistic Competition
   3.4 Monopolistic Competition and Long-Run Efficiency

4. Oligopoly
   4.1 The Conditions of Oligopoly
   4.2 Examples of Oligopoly
   News in Context: More Than Half Of Cell Phone Users Dissatisfied
   4.3 Oligopoly and the Behavior of Firms
   4.4 Is Oligopoly Rampant?

5. Summary and a Final Note

Appendix: A Formal Analysis of Monopoly and Monopolistic Competition
   A1 The Assumptions
   A2 Monopoly
   A3 Monopolistic Competition

Chapter 13: Markets for Labor
1. Thinking about Markets for Labor
   1.1 Labor as an Input to Production
   1.2 Labor Productivity

2. Individual Decisions and Paid Labor Supply
   2.1 The Opportunity Costs of Paid Employment
   2.2 The Benefits of Paid Employment
   2.3 The Individual Paid Labor Supply Curve

3. Supply and Demand at the Market Level
   3.1 Market Labor Supply
   3.1 Market Labor Demand
   3.2 Market Adjustment

4. Explaining Variations in Wages
   4.1 Human Capital
   4.2 Market Power
   News in Context: Both Sides in Writers’ Strike See New-Media Future at Stake
   4.3 Compensating Wage Differentials
   Economics in the Real World: Do “Warm Feelings” Substitute for Wages?
   4.4 Worker Motivation
   4.5 Discrimination
   News in Context: Wal-Mart Loses Bid to Block Group Bias Suit
5. Labor in the Traditional Model
   5.1 Labor Supply
   5.2 Labor Demand
Appendix: A Formal Model of a Firm’s Hiring Decision in Perfect Competition

Chapter 14: Markets for Other Resources
1. Valuing Capital Stocks
   1.1 The Value of Capital: A Simple Case with Certainty
   Math Box: The Present Value of Future Funds
   1.2 Varying Returns, Varying Costs, and Risk
   1.3 A Tougher Complication: Uncertainty
   1.4 Market Value
2. Markets for Manufactured, Natural, and Social Capital
   2.1 Manufactured Capital in the Traditional Model
   2.2 Should Natural Capital Be Treated Differently?
   2.3 Social Capital and Markets
3. Markets for Financial Capital
   3.1 When Businesses Need Financial Capital
   3.2 The Bond Market
   3.3 The Stock Market
   Economics in the Real World: Reading Financial Market Reports
   3.4 Households and Governments as Borrowers
   3.5 The Supply of Financial Capital
   3.6 A Last Note on Financial Capital Markets
   News in Context: Treasurys Fall as Funds Flow to Stocks

Part Five: A Closer Look at Economic Organizations

Chapter 15: The Core Sphere: Households and Communities
1. Households and Communities as Organizations
   1.1 The Functions of the Core Sphere
   Economics in the Real World: Valuing Core Sphere Activities
   1.2 Getting Information on Core Sphere Activities
2. The Core Sphere in Historical Perspective
   2.1 Pre-Industrial Economies
   2.2 “Outside” of the Economy?
   2.3 Shifting the Boundaries
   2.4 A Crisis in Care?
   Economics in the Real World: Bowling Alone?
3. “Work/Family” Challenges
   3.1 Employer Policies
   3.2 Government Policies
   3.3 Distributing the Costs of Care
4. Theories of Household Behavior
   4.1 The “Glued Together” Family
   4.2 The Dictatorship Theory
Chapter 16: The Business Sphere: For-Profit Firms

1. Businesses as Organizations
   1.1 The Legal Organization and Ownership of Firms
   1.2 Are Big or Small Businesses More Important?
   1.3 How Large Are the Largest Firms?

2. The Goals of Firms
   2.1 Shareholders and Profit?
   2.2 Stakeholders and Diverse Interests?
   Economics in the Real World: The Founding Principles of Johnson & Johnson
   2.3 Principal-Agent Problems
   News in Context: Audacious Climb to Success Ended in a Dizzying Plunge
   2.4 Conflict, Cooperation, and Motivation in Social Organizations

3. The Evolution of Big Business
   3.1 Technology and Economies of Scale
   3.2 Diverse Products: Economies of Scope
   3.3 Avoiding Transaction Costs
   3.4 Conglomerates

4. Is Bigger Always Better?
   4.1 Small Firms and Efficiency
   4.2 How Big Firms Depend on Small Ones
   4.3 Too Many Mergers?

5. Globalization and the Information Revolution
   5.1 Multinational Corporations
   5.2 Global Markets
   5.3 Subcontracting and Offshoring
   5.4 Global Competition and Well-Being

Chapter 17: The Public Purpose Sphere: Governments and Nonprofits

1. Public Purpose Organizations and Their Functions
   1.1 The Regulatory Function
   Economics in the Real World: Can a Market Be an “Open Access Resource”? 
   1.2 The Direct Provision Function

2. Types of Public Purpose Organizations
   2.1 Government Organizations
   Economics in the Real World: Two New York Nonprofits with a Focus on Government
   2.2 Domestic Nonprofit Organizations
   2.3 International Organizations

3. The Public Purpose Sphere in Historical Perspective
   3.1 Social Welfare
   3.2 Regulation of Monopolies and Trade Practices
News in Context: U.S. Told to Cut Cotton Subsidies
3.3 Regulation of Financial Markets
3.4 Environmental Protection
Economics in the Real World: Public Purpose Organizations and the Kyoto Protocol
3.5 Is Government Too Big?
News in Context: Toy Makers Seek Standards for U.S. Safety

4. Theories of Organizational Behavior
  4.1 The Theory of Pure Public Service
  4.2 The Theory of Pure Special-Interest “Capture”
  4.3 The Theory of Civic Responsibility

Part Six: Economic Outcomes and Economic Ideology

Chapter 18: The Variety of Economic Systems
1. Comparing Economic Systems
   1.1 Modes of Organization: An Elaboration
   1.2 Patterns of Ownership
   Economics in the Real World: Common Property Resources
2. Varieties of Capitalism and Socialism
   2.1 Classifying Capitalist Systems
   2.2 Classifying Socialist Systems
3. Comparative Systems in Historical Perspective
   3.1 The Anglo-American Experience of Laissez-Faire Capitalism
   3.3 Capitalism and Social Democracy in Western Europe
   3.3 Industry and Government in Japan and the Newly Industrializing Economies
   3.4 Russia and the Transition Economies
   3.4 China: From Administrative to Market Socialism
   3.5 Economies in Less Industrialized Countries
4. Comparing Economic Performance
   4.1 Average Incomes
   4.2 Health and Literacy
   4.3 Sustainability

Chapter 19: Market Systems and Normative Claims
1. Why Discuss Normative Claims?
   1.1 Debating the Merits of Systems
   1.2 Theory and Ideology
2. The Theory Behind the “Free Market” Argument
   2.1 The Set-Up: The Idealized World
   2.2 The Normative Standard: Pareto Efficiency
   2.3 The Result: “Markets Are Best”
   2.4 The Policy Prescription: Don’t “Interfere”
   2.5 Variations in Neoclassical Thinking
   2.6 Precision vs. Accuracy, Once Again
3. Contextual Economics: Into the Future
3.1 Varieties of Economic Thought
3.2 A Point to Ponder: Intergenerational Equity
3.3 A Point to Ponder: Individuals and Society
4. Last Words
